

Investor Activity Notification & Insight Platform

Short Description: A web-based platform that allows retail traders and investors to follow big names that are very well-known on wall street such as Warren Buffet, Bill Ackman, and Ken Griffin. They can receive notifications when one of or any figure makes a public appearance at an event, conference, podcast, interviews, or news mentions.

Problem it addresses: Retail investors often miss important information from a popular investor since they are busy doing other things within their life. So, in order to make it easier for them, this investor activity notification will let them know wherever they are in the world when their favorite investor is speaking.
